

Jesse O. Adesina

Fullstack Engineer

Email: jesseoluwapelumi01@gmail.com | LinkedIn: [Jesse Adesina](#) | GitHub: [Jessepelumi](#) | Portfolio: [Jeolad](#)

SKILLS

- **Technical Skills:** JavaScript, TypeScript, Python, C, Dart, Docker, CI/CD, Git, PostgreSQL, MongoDB, Firebase, React.js, Next.js, Flutter, Node.js, Express, HTML & CSS, Tailwind, Styled Components.
- **Soft Skills:** Teamwork, Communication, Presentation, and Time Management.

EXPERIENCE

- Mobile Developer, **Hire NG**, Nigeria. **July 2024 - Present**
 - Collaborated with product designers, a project manager, and another mobile developer to develop a mobile application to connect people with artisans.
 - Conducted thorough research to identify the most suitable third-party services for payments and in-app messaging.
 - Participated in the design and prototyping phase, providing feedback to improve the user interface and experience.
 - Key technologies: Dart, Flutter, Riverpod, Git, Docker.
- Student Tutor, **Aptech Computer Education**, Nigeria. **May 2024 - July 2024**
 - Developed comprehensive instruction manuals and taught C programming concepts to students, enhancing their understanding and proficiency in programming.
 - Managed students' final project and supervised its completion, ensuring quality and timeliness.
 - Oversaw student presentations to evaluate and guide their progress.

EDUCATION

- **Middlesex University, London, UK** **2025 - 2026**
BSc (Hons) Information Technology
Relevant coursework: Computer Programming, Artificial Intelligence.
- **Aptech Computer Education, Nigeria** **2022 - Present**
Advanced Diploma in Software Engineering
Grade: Distinction.
Relevant coursework: Object-Oriented Programming, Programming Principles & Techniques, Data Management, Data Structures and Algorithms.
- **University of Lagos, Akoka, Nigeria** **2018 - 2022**
BSc (Hons) Surveying and Geoinformatics
Relevant coursework: Introduction to Engineering Computing (C#).

PROJECTS

- **Instavoid (instavoid-repo)**
 - Utilized Flutter to develop a media-sharing application that enables users to upload pictures and videos.
 - Extensively used Riverpod to manage the application's state, ensuring efficient data flow within the application.
 - Implemented core features to comment on, like, and delete posts.
 - Key technologies: Dart, Flutter, Riverpod, Firebase.
